TITLE	1992 Census of Governments. Volume 4: Government Finances; Number 1: Public Education Finances.
INSTITUTION	Bureau of the Census (DOC), Washington, DC. Economics and Statistics Administration.
REPORT NO	GC92(4)-1
PUB DATE	Nov 95
NOTE	187p.
AVAILABLE FROM	Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.
PUB TYPE	Reports - Descriptive (141) -- Collected Works - Serials (022) -- Statistical Data (110)
EDRS PRICE	MF01/PC08 Plus Postage.
DESCRIPTORS	Assessed Valuation; *Educational Finance; Elementary Secondary Education; Enrollment; Expenditure per Student; *Expenditures; Federal Government; Higher Education; *Income; Local Government; Property Taxes; *Public Schools; *Resource Allocation; Salaries; State Government

ABSTRACT

This 1992 report places the education finance data released by the United States Census Bureau in a single report. It contains financial statistics relating to public higher, elementary-secondary and other education. It presents national and state financial aggregates and displays data for each public school system with an enrollment of 5,000 or more. Introductory text describes the scope, concepts, sources, survey methodology, and limitations of data. It also identifies other Census Bureau products that contain public education finance data. The tabular section contains 24 tables. The first six tables show public elementary-secondary education, higher education, and other education finances within the structure of governments in the United States. Table 1 presents a 5-year summary of federal, state, and local government education expenditures. Tables 2 through 6 contain detail on education expenditures by state and local governments with data aggregated for each state. The remaining tables pertain only to elementary-secondary education finances. National summaries and size-group data for elementary-secondary education systems appear in tables 7 and 8. Summaries and state-level detail are presented in tables 9 through 18. Elementary-secondary finance data are shown in table 9, revenues in tables 10 through 13, expenditures in tables 14 through 17, and indebtedness in table 18. State rankings based on revenues and expenditures per student appear in table 19. State rankings based on the relation of revenues and expenditures to state personal income are shown in table 20. Finance data for individual public school systems with enrollments of 5,000 or more are displayed in tables 21, 22, and 23. Supplementary data on state-level populations, enrollments, and personal income are shown in table 24. Five figures are included. Appendices contain definitions, a description of state-by-state differences in financing methods, a list of state abbreviations, and a table showing federal government expenditures for education. Acknowledgments

This report was prepared in the Governments Division by the Elementary Secondary Education Statistics Branch, headed by **Lawrence R. MacDonald. Sharon J. Meade** coordinated data assembly and review, assisted by **Regina A. Padgett** and **Jack E. Zezula.**

Timothy Antisdel performed the data processing operations. **Linda Beaton** and **Michael C. Freeman** developed and maintained the table programs for this report under the supervision of **Kathleen E. Chamberlain,** Chief of the Computer Utilization Branch.

Corrine W. Davis supervised preparation of publication copy.

The staff of Administrative and Customer Services Division, **Walter C. Odom,** Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement. **Frances B. Scott** provided publication coordination and editing.

The cooperation of the numerous State and local officials in providing information for this report is gratefully acknowledged.

For information regarding data in the report, contact **Lawrence R. MacDonald** or **Sharon J. Meade,** Governments Division, Bureau of the Census, Washington, DC 20233, or phone toll free 1-800-457-4196.

Census of Governments

INTRODUCTION

A census of governments is taken at 5-year intervals as required by law under Title 13, United States Code, Section 161. This 1992 census, similar to those taken since 1957, covers four major subject fields—government organization, taxable property values, public employment, and government finances.

Volume 4, *Government Finances*, contains six parts that cover a wide range of State and local government financial activity in fiscal year 1991-92. They are: No. 1, *Public Education Finances*; No. 2, *Finances of Special Districts*; No. 3, *Finances of County Governments*; No. 4, *Finances of Municipal and Township Governments*; No. 5, *Compendium of Government Finances*; and No. 6, *Employee-Retirement Systems of State and Local Governments*.

This report, No. 1, contains financial statistics relating to public higher, elementary-secondary, and other education. It presents national and State financial aggregates and displays data for each public school system with an enrollment of 5,000 or more.

ORGANIZATION OF THIS REPORT

This introductory text describes the scope, concepts, sources, survey methodology, and limitations of data. It also identifies other Census Bureau products which contain public education finance data.

The tabular section contains 24 tables. The first six tables show public higher, elementary-secondary, and other education finances within the structure of governments in the United States. Table 1 presents a 5-year summary of Federal, State, and local government education expenditures. County, municipal, town, special district, and school district detail appear under the local government section of this table. Tables 2 through 6 contain detail on education expenditures by State and local governments with data aggregated for each State.

The remaining tables in this report pertain to only elementary-secondary education finances. National summaries and size-group data for elementary-secondary education systems appear in tables 7 and 8. Summaries as well as State-level detail are presented in tables 9 through 18. Elementary-secondary finance data are shown in table 9, revenues in tables 10 through 13, expenditures in tables 14 through 17, and indebtedness in table 18.

State rankings based on revenues and expenditures per pupil appear in table 19. State rankings based on the relation of revenues and expenditures to State personal income are shown in table 20.

Finance data for individual public school systems with enrollments of 5,000 or more are displayed in tables 21, 22, and 23. Data are presented in thousands of dollars in table 21 for revenue, expenditure, and indebtedness items. Table 22 displays percent distributions of Federal, State, and local revenue for these same school systems. Per pupil expenditure data appear in table 23.

Supplementary data on State-level populations, enrollments, and personal income are shown in table 24.

SCOPE

This 1992 report places the education finance data released by the Census Bureau in a single report. Data pertain to all elementary-secondary, higher, and other education financed by Federal, State, and local governments. This information represents an important cross section of data collected in the Census Bureau's government finance survey. Most of the statistics presented in this report have been published in separate annual and census of governments reports that focus on the finances of school systems, States, counties, cities and towns, and government finances in general.

National and State totals of education expenditure data that can be found in other Census Bureau reports appear in tables 1 through 6. The items presented in these tables adhere to standard Census Bureau definitions. They are similar in scope to the education finance data traditionally released by the Census Bureau.

The scope of the elementary-secondary data presented in tables 7 through 23 has been expanded to contain some new revenue and expenditure categories. These categories, which relate mostly to State government payments made on behalf of local school systems, make the State aggregate data more comparable between States. They also allow for the inclusion of financial data which most users consider to fall within the purview of elementary-secondary education.

GENERAL CONCEPTS

Refer also to Appendix A (Definitions of Selected Terms) for descriptions of the items appearing in this report.

Education

Consists of three major categories: Elementary-secondary, higher, and other education.

Elementary-Secondary education. This category covers financial activity for the operation and support of public school systems providing elementary and/or secondary education programs. With the exception of the relatively few college level programs offered by elementary-secondary school systems, all activities of the system are classified as elementary-secondary. These include not only instruction and support activity for regular, special, and vocational instruction programs but also summer school, adult education, community services, food services, student activities, pre-kindergarten, transportation services, school health programs, and operation and maintenance of plant. Adult education and community services are two types of programs operated in many elementary-secondary school systems that are not related to the performance of elementary-secondary education programs. Effective for the 1991-92 public school finance report, the expenditures for these programs are not included in the per pupil data for current spending in tables 8, 16, and 23. Expenditures made by public school systems for these programs continue to be included in the expenditure data presented in the other tables.

Higher education. —This classification includes the financial activity of all local government units offering postsecondary education and State institutions of higher education that confer degrees. Included here are college programs offered by elementary-secondary systems and all State and local government universities, community and junior colleges. Higher education activities include education services, auxiliary enterprises, and independent research and development operations. Education assistance and subsidies, including scholarships, fellowships, and support of private institutions, are excluded and reported under "Other education."

Other education. This category is restricted to the Federal and State government levels. It consists of administrative support, schools run by the Departments of Defense and Interior, special State-run schools for the deaf and blind, State schools not conferring degrees (usually adult or vocational-technical schools), and education subsidy payments. Included here are scholarship and fellowship payments. Pell grants are treated as education subsidy payments by the Federal Government to individuals. Even though Pell grants are included in many financial reports of State and local higher education institutions, this report includes them only in data displayed for the Federal Government.

Public School Systems

The term "public school systems," as used for this report, includes two types of government entities with responsibility for providing education services: (1) School districts that are administratively and fiscally independent of any other government and are counted as separate governments; and (2) public school systems that lack sufficient autonomy to be counted as separate governments and are classified as a dependent agency of some other government—a county, municipal, township, or State government.

The table below shows the number and type of independent and dependent systems as they existed in October, 1991. While most public school systems offer elementary and/or secondary programs, some provide only college-grade coverage. Others, known as "nonoperating" systems, only exist to collect tax revenue which is then transferred to other school systems that provide the education services. The table also identifies education service agencies which have been classified as dependent agencies of the school systems that they serve. These agencies typically provide regional special education or vocational education programs. While they are not recognized as separate school systems, they are important providers of public education services. The financial data for these regional agencies are collected by the Census Bureau and included in the tabular presentations.

Public School Systems: October 1991

Type of system	Number
All public school systems	15,834
Independent school districts	14,422
Elementary-secondary districts	13,759
College grade districts	379
Combined elementary-secondary and college grade districts	10
Regional vocational or special education districts	93
Nonoperating districts	181
Dependent school systems	1,412
Elementary-secondary systems	1,142
State government systems	28
County government systems	317
City government systems	219
Town government systems	578
College grade systems	126
County government systems	121
City government systems	5
Combined elementary-secondary and college grade system	1
Vocational or special education systems	77
Nonoperating systems	66
EXHIBIT: Education service agencies classified as part of the elementary-secondary districts they serve	1,039

Source: U.S. Bureau of the Census, 1992 Census of Governments.

These public school systems and education service agencies provide almost all of the public elementary-secondary education programs in the nation but only a small fraction of college-grade programs. With the exceptions of the University of the District of Columbia, the District of Columbia Law School, Washburn University (Topeka, Kansas), and the Fashion Institute of Technology

(New York, N.Y.); public degree-granting colleges and university programs are the exclusive domain of State government institutions of higher education. While local public school systems operate many community and junior colleges, the 2-year colleges fall under State control in 28 States.[1]

Current Dollars

The statistics in this report, as in the others issued by the Census Bureau on Federal, State, and local government finances, are in terms of current dollar amounts. They have not been adjusted for price and wage changes occurring through the years.

Fiscal Years

Data in this report pertain to school system fiscal years that ended June 30, 1992, except for the following: Alabama—September 30, 1992; Colorado—December 31, 1991; Nebraska, Texas, and the Chicago Board of Education—August 31, 1992.

Current Operation and Current Spending

Current operation, a standard Census Bureau expenditure category, consists of payments for salaries, employee benefits (to include local school system employer contributions to State government retirement funds), purchased services, and supplies. It is a component of the expenditure data presented in tables 1 through 6.

The Census Bureau introduced the concept "current spending" in the 1987 Census of Governments. This concept, which is used only in the public education finance reports, allows for the inclusion of all public elementary-secondary outlays regardless of the specific unit of government which actually makes the expenditures. Thus this concept—employed in tables 7, 8, 9, 14 through 17, 19 through 21, and 23—is comprised of current operation expenditure and two other items: payments made by the State government on behalf of local education agencies and employer contributions made by those few school systems that administer their own retirement funds (such as the Chicago Board of Education and the Denver Public School System). Most of the expenditures made by States on behalf of their school systems are for State retirement funds and social security contributions. These "on behalf of" contributions are displayed by State in table 11. "Current spending" is not presented in other Census Bureau reports because its inclusion with expenditures made at other levels of government leads to double counting.

[1]All or most of the 2-year colleges in the following 28 States are classified by the Census Bureau as State institutions of higher education: Alabama, Alaska, Arkansas, Colorado, Connecticut, Delaware, Georgia, Hawaii, Indiana, Kentucky, Maine, Massachusetts, Minnesota, Nevada, New Hampshire, New Mexico, North Dakota, Oklahoma, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia, Washington, West Virginia, and Wisconsin.

Instruction Expenditure

This item relates to the instruction function (series 1000) defined in the National Center for Education Statistics (NCES) publication, *Financial Accounting for Local and State School Systems*, commonly called Handbook II, Revised (1990). It covers expenditures for regular, special, and vocational programs offered in both the regular school year and summer school. It excludes instructional, student, and other support activities as well as adult education, community services, and student enterprise activities.

Since not all States prescribe the use of the above financial accounting handbook and its definition of instruction for their school systems, some interstate disparities exist. For example, some State accounting systems do not include employee benefit payments or fixed charges in "instruction." Refer to appendix B for descriptions of how the Census Bureau has dealt with these differences.

Intergovernmental Revenues and Educational Revenues From Federal, State, and Local Sources

Intergovernmental revenue is the traditional term used by the Census Bureau to define revenue received from the Federal, State, and local governments. Intergovernmental revenue from the Federal Government includes only those amounts that the recipient gets directly from the Federal Government. Federal monies that public school systems receive through State channels are included under intergovernmental revenue from the State. Intergovernmental revenue from local governments includes only amounts that the recipient gets from other local governments. The revenue tables in this report do not use these traditional terms which appear in other Census Bureau governmental finance reports.

The tables in this report that contain revenue data reference revenue from Federal, State, and local sources. There are significant differences between these terms and the intergovernmental items described above. Revenue from Federal sources includes Federal monies passed through State governments as well as Federal outlays directly received. State source revenue consists of only amounts originating from State governments. Revenue from local sources is comprised of revenues raised locally—including taxes, charges, and miscellaneous revenue. Intergovernmental revenue from local governments is only a small component of revenues from local sources. These terms are used instead of the Census Bureau's traditional intergovernmental revenue terms due to their widespread acceptance by the education data user community.

Tax Revenues of Dependent School Systems

Dependent school systems receive most of their local revenue from appropriations by their parent government. Although most of these monies come from property tax collections, the exact amounts derived from taxes or other revenue sources available to parent governments for their

school systems frequently cannot be determined from State education agency accounting records. In this report, this type of revenue appears in a separate category, "parent government contributions."

SOURCES OF DATA

Federal, State, and Large County and City Governments

Financial data for these governments were compiled from official records and reports by trained Census Bureau representatives. Federal Government data are based on figures for 1992 that appear in *The Budget of the United States Government for the Fiscal Year 1994*. Much of the data for the States and large local governments (cities with populations of 300,000 or more and counties with populations of 500,000 or more) were obtained by on-site visits to government accounting offices by Census Bureau field staff. Compilation efforts focused on all financial activities of these large governments. Census staff assembled finance data into standard census classifications. Education was one of many functions covered in these compilations.

Other Counties, Cities, Towns, and Special Districts

Information was obtained from Census Bureau mail canvass and by central collection from State government data systems. Both of these sources used detailed questionnaires which asked for financial data for all government activities. As with the larger units described above, education was only one of many functions included.

Elementary-Secondary School Systems

The Census Bureau has made arrangements with State government departments of education to use data from existing finance information collection systems where the data are compatible with this survey's categories. Every State department of education obtains data annually on a wide variety of financial data from elementary-secondary school systems by requiring reports or conducting surveys. The Census Bureau is able to gain access to this information through unique agreements with each State that are summarized below.

1. Compilation from State education agency source documents by Census Bureau staff (6 States): Alaska, Hawaii, Mississippi, New Mexico, Rhode Island, and Utah.
2. Computer tape or disk of data in State agency format which is reformatted by Census Bureau staff (21 States): Arizona, Arkansas, California, Colorado, Georgia, Indiana, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, New Jersey, North Dakota, Ohio, Oklahoma, South Carolina, Tennessee, and Wisconsin.
3. Computer tape or disk reformatted by State education agency staff (19 States): Alabama, Illinois, Idaho, Iowa, Kansas, Maryland, Minnesota, Missouri, Nevada, New York, Oregon, Pennsylvania, South Dakota, Texas, Vermont, Virginia, Washington, West Virginia, and Wyoming.
4. Computer printouts of data reformatted by State education agency staff (4 States): Connecticut, Delaware, Florida, and North Carolina.

A single office or data base in the departments of education did not always have all of the information needed for this survey. In these instances, other sources—most often different State offices—supplied information to supplement the basic data. The most common types of data needing supplementation were school lunch finances, indebtedness, cash and security holdings, and capital fund transactions.

Higher Education Institutions

Through agreement with the NCES, the Census Bureau obtained financial data for State and local government higher education institutions from the Integrated Postsecondary Education Data System (IPEDS) Finance Survey.

Enrollment, Population, and Personal Income Data

The State totals for enrollment that appear in table 24 are used to calculate the per pupil amounts in tables 16, 19, and 22. They represent fall 1991 memberships collected by NCES in its nonfiscal Common Core of Data survey (CCD). The enrollment figures in tables 21 and 23 for the individual school systems reflect fall 1991 memberships as reported by the State education agencies in the NCES CCD survey.

The population data contained in table 24 were obtained from the Census Bureau's *Current Population Reports*, Series P-25. The personal income data, which were used to calculate the data for tables 20 and 24, were taken from the U.S. Department of Commerce's *Survey of Current Business*.

SURVEY METHODOLOGY

The information collected is intended to provide a complete picture of a government's financial activity. All revenues (by source), expenditures (by function and object), indebtedness, and cash and security holdings are requested for all funds. The inclusion of all financial transactions, except for interfund transfers, allows for effective review and editing. It enables respondents and Census Bureau staff to take a global view of government finance and to perform basic cash flow logic checks.

The Census Bureau has attempted to identify all central sources for public elementary-secondary finance data. Most of these sources exist at the State government level. Many State agencies, especially State education agencies, collect financial data for the local units within their domains.

The collection arrangements have a number of distinct advantages. First, because the Census Bureau is able to use data from the State government data systems, response burden on local school system administrators is lessened. Second, the close relationship between local school systems and State departments of education virtually eliminates nonresponse problems. Perhaps most important, however, is the fact that this collection system yields high quality data. The audit, review, edit and correction procedures employed by State departments prior to providing the information to the Census Bureau help make the data superior to information that could be collected from the individual school systems.

The extensive use of central collection of elementary-secondary finance data requires the maintenance of State-specific crosswalks that define the State data items which comprise each of the items collected by the Census Bureau. Edit checks identify cash and debt flow problems, significant current year/prior year differences, illogical salary/current spending relationships, out-of-scope per pupil expenditures, and other peculiarities. Census examiners resolve edit and other problems by rechecking data sources for entry errors, reviewing State and other reports which contain the same type of information, and making followup calls to State and local officials.

Effective for the FY 1992 survey, the Census Bureau significantly expanded the Federal program revenue detail collected for elementary-secondary school systems. Revenues from programs such as Chapter 1, education for the handicapped, vocational education, and Eisenhower math and science were included for the first time. In many cases, this detail could not be supplied from State education agency basic source documents, which could provide accurate totals of Federal revenue receipts but not program detail. In these cases, the Census Bureau used supplemental data available from the General Education Provisions Act (GEPA) 406A Survey, conducted by the Office of Policy and Planning, U.S. Department of Education. Although the GEPA program detail was used, the total Federal revenues supplied by the State education agencies were not changed.

The Census Bureau processes parent governments separately from their dependent school systems because they each require a different level of detail. Parent governments contain financial data for all functions performed by the government. The dependent school system detail is much more extensive than the education finance detail collected from their parent governments. After the dependent school system information is edited, reviewed, and corrected, it is summed and overlaid into the parent government fiscal information sets. This overlay ensures consistency between data presented for parent governments and their fiscally dependent school systems.

Financial data for school systems are summed to create State aggregates. Census Bureau staff review State aggregates for consistency with prior year information and compare them to State totals released by State education agencies and financial data collected in the National Public Education Financial Survey by NCES.

The 1992 State aggregate data in this report are based on universe data for both the institutions of higher education and the elementary-secondary school systems. Due to extensive use of central collection of elementary-secondary data from the State education agencies, nonresponse was under 0.2 percent of the survey universe. One of two methods was used to adjust for nonresponse for these small number of cases: (1) the information was compiled from an FY 1992 audit on file with the Census Bureau's Single Audit Clearinghouse or (2) prior year information was used.

LIMITATIONS OF DATA

Finance amounts presented in this report are statistical in nature and do not represent an accounting statement. Therefore, a difference between a school system's revenues and expenditures does not indicate a "budget" surplus or deficit. Large capital outlay expenditures, debt issuance or retirement, and changes in cash and security holdings are all factors that have important influences on the balance between revenues and expenditures.

In spite of efforts to identify and resolve errors, some mistakes and inconsistencies in official reporting and processing have undoubtedly escaped detection. Other inconsistencies have been detected and are published with the caveats shown in appendix B. They arise from the fact that each State education agency collects a varying level of detail. Although States generally collect much more detail than what the Census Bureau collects, there are instances when certain States cannot provide some of the items requested. The use of different financial accounting handbooks by the State education agencies also causes inconsistencies in the data.

Effective for the FY 1992 survey, the Census Bureau requested that respondents for elementary-secondary finances report State revenues according to the following program categories: general formula assistance, compensatory and basic skills, special education, staff improvement, vocational, capital outlay/debt service, bilingual education, transportation, and school lunch. Users should be able to make valid comparisons of this detail when examining school systems within a given State. Because the content of State aid programs greatly varies among the States, however, this information may not be comparable when making comparisons between school systems in different States. For example, State monies for handicapped and compensatory education may be in specific categorical aid programs in one State but be part of general formula assistance in another State.

The information in this report reflect the financial transactions of public school systems. The revenues, expenditures, and debt of entities that are not public school systems are excluded. These include private educational enterprises, State government agencies, quasi-private organizations, and county superintendent offices not part

of public school systems. The absence of detail from these entities sometimes creates differences between the school finance data in this report and that produced from both other Census Bureau governmental finance reports and from other sources. For example, State and national totals for the various Federal program revenues are lower than those reported in other sources because they reflect only what the public school systems receive.

AVAILABILITY OF DATA

Copies of this report are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 and U.S. Department of Commerce district offices.

Computer tapes containing financial data for each school system processed in the survey year are also available. For details, contact the Data User Services Division, Customer Services (tapes), Bureau of the Census, Washington, DC 20233.

School finance information is available on microcomputer disks or can be transmitted over the Internet. For details, contact Chief, Elementary-Secondary Education Statistics Branch, Governments Division, Bureau of the Census, Washington, DC 20233, or call (301) 457-1574.

ACKNOWLEDGMENT

The generous cooperation of State education agency personnel is gratefully acknowledged. The time and effort extended by these individuals made it possible to produce this report while imposing a minimum burden on local school officials. The Census Bureau also appreciates the dedication of local school officials in providing accurate fiscal data to their State education agencies.

MEANING OF ABBREVIATIONS AND SYMBOLS

The abbreviations and symbols in the tables have the following meanings:

—	Represents zero or rounds to zero.
(NA)	Not available.
(X)	Not applicable.

Note: Local government data were taken from the 1992 Survey of Local Government Finances. Higher education expenditures will not correspond to data in tables 1 through 4 due to the inclusion in this table of education assistance and subsidy payments from State institutions and interest paid on debt from local institutions.

[1]Duplicative interschool system transactions are excluded.

[2]Includes State government assistance and subsidy payments for scholarships and fellowships.

by State: 1991-92

Note: This information represents financial data for public independent and dependent school systems. It includes State payments made on behalf of public school systems and excludes financial transactions of public nonschool entities. It will therefore differ from the education statistics presented in the other Census of Governments reports and in tables 1 through 6 of this report. Expenditures for adult education, community services, and other non-elementary/secondary programs are included under "current spending" and "other current spending" but are excluded from these categories in the per pupil data displayed in table 8.

Table 8. Per Pupil Amounts of Public School System Finances for Elementary-Secondary Education by Enrollment-Size Groups: 1991-92

[Dollars. Detail may not add to total because of rounding. For meaning of abbreviations and symbols, see introductory text]

Note: This information represents financial data for public independent and dependent school systems. It includes State payments made on behalf of public school systems and excludes financial transactions of public nonschool entities. It will therefore differ from the education statistics presented in the other Census of Governments reports and in tables 1 through 6 of this report. See appendix B for a description of State-specific reporting anomalies. Expenditures for adult education, community services, and other non-elementary/secondary programs are included under "current spending" but are excluded in the per pupil data displayed in tables 16 and 23.

[1]Duplicative interschool system transactions are excluded.

Table 10. Revenue From Federal Sources for Public Elementary-Secondary School Systems by State: 1991-92

[Thousand dollars. Detail may not add to total because of rounding. For meaning of abbreviations and symbols, see introductory text]

Note: State and national totals in this table are lower than the actual totals for these Federal programs. This information includes only the revenue received by public school systems and excludes monies received by non-public school system organizations such as State agencies and private entities. The value of school lunch commodities is also excluded.

[1] Amounts are combined in other and nonspecified Federal aid distributed through State.

Note: See appendix B for a description of State-specific reporting anomalies. Expenditures to other school systems are excluded in this table. Expenditures for adult education, community services, and other non-elementary/secondary programs are included under total current spending and "other functions" but are excluded in the per pupil data displayed in tables 16 and 23. Users should exercise particular care in comparing employee benefits expenditure data. Appendix B identifies State payments on behalf of local education agencies which cause fluctuations in this category.

Table 15. Support Services Expenditure of Public Elementary-Secondary School Systems by Function and State: 1991-92

[Thousand dollars. Detail may not add to total because of rounding. For meaning of abbreviations and symbols, see introductory text]

Note: See appendix B for a description of State-specific reporting anomalies. Expenditures to other school systems are excluded in this table. Expenditures for adult education, community services, and other non-elementary/secondary programs are also excluded. Users should exercise particular care in comparing employee benefits expenditure data. Appendix B identifies State payments on behalf of local education agencies which cause fluctuations in this category.

[1]Minor amounts of short-term indebtedness incurred by independent school systems are included in the long-term indebtedness figures and are not separately identifiable. Short-term indebtedness of dependent school systems in many cases cannot be distinguished from the total indebtedness of their parent government.

Note: See appendix B for a description of State-specific reporting anomalies. Revenues from and expenditures to other school systems are excluded to avoid double-counting. Expenditures for adult education, community services, and other non-elementary/secondary programs are also excluded. Some data appear under local sources for Hawaii's State-operated school system for consistency with data presented for all other school systems. Users should exercise particular care in comparing employee benefits expenditure data. Appendix B identifies State payments on behalf of local education agencies which cause fluctuations in this category.

Note: See appendix B for a description of State-specific reporting anomalies. Revenues from and expenditures to other school systems are excluded to avoid double-counting. Expenditures for adult education, community services, and other non-elementary/secondary programs are also excluded. Some data appear under local sources for Hawaii's State-operated school system for consistency with data presented for all other school systems. Users should exercise particular care in comparing employee benefits expenditure data. Appendix B identifies State payments on behalf of local education agencies which cause fluctuations in this category.

Table 21. Finances of Individual Public Elementary-Secondary School Systems With

[Thousand dollars. Detail may not add to total because of rounding. For meaning of abbreviations and symbols, see introductory text]

Note: See appendix B for a description of State-specific reporting anomalies. Revenues from and expenditures to other school systems are included in this table. Expenditures for adult education, community services, and other non-elementary/secondary programs are included under total general expenditure, total current spending, and other current spending but are excluded in the per pupil data displayed in tables 16 and 23. Users should exercise particular care in comparing State revenue and employee benefits expenditure data. Appendix B identifies State payments on behalf of local education agencies which cause fluctuations in these categories. Data for specific State revenue programs are generally comparable for school systems in the same State but not for school systems in other States.

[1]Enrollments reflect fall 1991 memberships reported to the National Center for Education Statistics in the Public Elementary-Secondary Education Agency Universe Survey.

[2]Due to the use of different financial accounting standards, pupil support expenditures for school systems in Arizona, California, Kentucky, Maine, New Jersey, and Tennessee are not comparable with data for school systems in other States.

[3]Due to the use of different financial accounting standards, staff support expenditures for school systems in Arizona, California, Kentucky, Maine, Massachusetts, New Jersey, and Tennessee are not comparable with data for school systems in other States.

[4]Due to the use of different financial accounting standards, general administration expenditures for school systems in California, Maine, New Jersey, and Ohio are not comparable with data for school systems in other States.

[5]Due to the use of different financial accounting standards, school administration expenditures for school systems in Arizona, Kentucky, New Jersey, New Mexico, and Ohio are not comparable with data for school systems in other States.

Note: See appendix B for a description of State-specific reporting anomalies. Where State accounting practices permit, revenues from other school systems are included under "other local governments." Some data appear under local sources for Hawaii's State-operated school system for consistency with data presented for all other school systems. Users should exercise particular care in comparing State revenue data. Appendix B identifies State payments on behalf of local education agencies which cause fluctuations in this category.

Note: See appendix B for a description of State-specific reporting anomalies. Expenditures to other school systems are excluded in this table. Expenditures for adult education, community services, and other non-elementary/secondary programs are also excluded. Users should exercise particular care in comparing employee benefits expenditure data. Appendix B identifies State payments on behalf of local education agencies which cause fluctuations in this category.

[1]Enrollments reflect fall 1991 memberships reported to the National Center for Education Statistics in the Public Elementary-Secondary Education Agency Universe Survey.

[2]Due to the use of different financial accounting standards, pupil support expenditures for school systems in Arizona, California, Kentucky, Maine, New Jersey, and Tennessee are not comparable with data for school systems in other States.

[3]Due to the use of different financial accounting standards, staff support expenditures for school systems in Arizona, California, Kentucky, Maine, Massachusetts, New Jersey, and Tennessee are not comparable with data for school systems in other States.

[4]Due to the use of different financial accounting standards, general administration expenditures for school systems in California, Maine, New Jersey, and Ohio are not comparable with data for school systems in other States.

[5]Due to the use of different financial accounting standards, school administration expenditures for school systems in Arizona, Kentucky, New Jersey, New Mexico, and Ohio are not comparable with data for school systems in other States.

Appendix A.
Definitions of Selected Terms

Major categories for the Census Bureau's classification of government finances, as applicable to school systems, are defined below.

Assistance and Subsidies. Direct cash grants to individuals for tuition, scholarships, and fellowships and aid to nonpublic educational institutions. Excludes Pell grants to individuals.

Bond Funds. Funds established to account for the proceeds of bond issues pending their disbursement.

Capital Outlay. Direct expenditure for contract or force account construction of buildings, roads, and other improvements, and for purchases of equipment, land, and existing structures. Includes amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditure for repairs to such works and structures is classified as current operation expenditure.

Cash and Deposits. Cash on hand and on deposit, including any savings and other time deposits as well as demand deposits.

Cash and Security Holdings. Cash, deposits, and government and private securities (bonds, notes, stocks, mortgages, etc.) except holdings of agency and private trust funds. Does not include interfund loans, receivables, and the value of real property and other fixed assets.

Construction. Production of fixed works and structures and additions, replacements, and major alterations thereto, including planning and design of specific projects, site improvements, and provision of equipment and facilities that are integral parts of a structure. Includes both contract and force account construction.

Contribution From Parent Government. That portion of general revenue from own sources which is appropriated and transferred to a dependent school system by its parent government. Excludes intergovernmental revenue, current charges, and miscellaneous general revenue.

Current Charges. Amounts received from the public for performance of specific services benefiting the person charged and from sales of commodities and services. Includes school lunch sales (gross), tuition paid by individuals, and receipts from centrally administered student activity funds. Excludes amounts received from other governments and interfund transfers.

Current Operation. Direct expenditure for salaries, employee benefits, purchased professional and technical services, purchased property and other services, and supplies. It includes gross school system expenditures for instruction, support services, and noninstructional functions. It excludes expenditures for debt service, capital outlay, and reimbursement to other governments (including other school systems). Also excluded are payments made on behalf of the school system by other governments including employee retirement payments made by State governments to State retirement funds and to social security. Employer contributions made by those few school systems that have their own retirement systems (such as the Chicago Board of Education, Hawaii public schools, and New York City schools) into own retirement funds are excluded. Current operation expenditure is a standard classification item used in all Census Bureau government finance reports.

Current Spending. Comprises current operation expenditure (as defined above), payments made by the State government on behalf of school systems, and transfers made by school systems into their own retirement funds. This classification is used only in Census Bureau education reports in an effort to provide statistics for users who wish to make interstate comparisons. It is not used in other government finance reports to avoid double-counting expenditures between levels of government and funds. While expenditures made by the State government on behalf of the school systems are available on a State aggregate basis, they are frequently not available for each school system in given States. Therefore, these payments are included under **Current Spending** in the tables which display State totals but are often excluded in the tables which display individual school systems. **Appendix B** identifies this anomaly on a State-by-State basis.

Debt. Long-term credit obligations of the school system or its parent government and all interest-bearing short-term (repayable within 1 year) credit obligations. Excludes noninterest-bearing short-term obligations, interfund obligations, amounts owed in a trust or agency capacity, advances and contingent loans from other governments, and rights of individuals to benefits from school system employee-retirement funds.

Debt Outstanding. All debt obligations remaining unpaid on the date specified.

Direct Expenditure. Payments to employees, suppliers, contractors, beneficiaries, and other final recipients of government payments. It includes current operation, interest paid on debt, and capital outlay but excludes interfund transfers and payments made to other governments.

Education. Includes expenditures to and by public elementary-secondary school systems, higher education institutions, and outlays for other education activities. **Elementary-Secondary** covers all instruction, support services, and noninstructional support activities offered by public elementary-secondary school systems. Regular, special, vocational, and adult education programs offered by elementary-secondary school systems are considered part of this category as well as State government intergovernmental foundation and other grants to local education agencies. Included in Higher Education are all local government post secondary institutions and State universities, community, junior, and other degree conferring colleges. Education and general, auxiliary enterprises, and independent research and development activities are included in **higher education** but university hospitals, land grant college agriculture experiment station and extension services, and scholarship and fellowship payments are excluded. **Other Education** applies only to State governments. It consists of educational administration, tuition grants, scholarships and fellowships (excluding Pell grants), aid to private schools, and special programs—schools for deaf and blind and State institutions which do not grant degrees.

Elementary and Secondary Education. See under **Education.**

Employee-Retirement Expenditure. Cash payments to beneficiaries (including withdrawals of contributions) of employee-retirement systems. Excludes cost of administering retirement systems, school system contributions to State administered employee-retirement systems, and noncontributory gratuities paid to former employees.

Employee-Retirement Revenue. Retirement contributions received from employees and other government or private employers, earnings on investment assets set aside to provide income for retirement system purposes, and State government contributions. Excludes contributions from the employing school district (which are intragovernmental transfers).

Employee Benefits Expenditure. Amounts paid by the school system for fringe benefits. These amounts are not included in salaries and wages paid directly to employees. Includes contributions on behalf of employees for retirement coverage, social security, group health and life insurance, tuition reimbursement, workmen's compensation, and unemployment compensation.

Enrollment. Count of pupils on pupil rolls in the fall of the school system's fiscal year for which data are shown.

Equipment. Apparatus, furnishings, motor vehicles, office machines, and the like having an expected life of more than 5 years. Equipment expenditure consists only of amounts for purchase of equipment, including both additional equipment and replacements. Expenditures for facilities that are integral parts of structures are classified as expenditure for construction or for purchase of land and existing structures.

Expenditure. All amounts of money paid out by a school system—net of recoveries and other correcting transactions—other than for retirement of debt, purchase of securities, extension of loans, and agency transactions. Note that expenditure includes only external transactions of a school system and excludes noncash transactions such as the provision of perquisites or other payments-in-kind.

Federal Aid—Direct. Aid from project grants for programs such as Impact Aid (P.L. 81-815 and P.L. 81-874), Indian Education, Bilingual Education, Head Start, Follow Through, Magnet Schools, Dropout Demonstration Assistance, and Gifted and Talented.

Federal Aid—Distributed by State Governments. Aid from formula grants distributed through State government agencies. Includes revenue from such programs as:

Child Nutrition Programs. Includes revenues from National School Lunch, Special Milk, School Breakfast, and A la Carte programs. Excludes the value of donated commodities.

Compensatory Programs. Revenues authorized by Chapter 1 of the Elementary Secondary Education Act (P.L. 89-10). Includes basic, concentration, and migratory education grants.

Handicapped Programs. Revenues awarded under the Children with Disabilities Act (P.L. 91-230). Includes formula grants authorized in Part B of this legislation but excludes project grants authorized in Part C (Early Education and Severely Disabled Programs), Part E (Innovation and Development), and Part G (Technical Development). Revenues from these excluded project grants are included in Federal Aid—Direct.

Vocational Programs. Revenues from the Carl D. Perkins Vocational Education Act (P.L. 101-392). Includes revenues from Title II (Basic Grants), Title III-A (Community Based Organizations), Title III-B (Consumer and Homemaking Education), and Title III-E (Tech-Prep Education).

Other. Includes revenues from other formula grant programs distributed through State governments, such as the Adult Education Act (Part B), Chapter 2 Block Grants sanctioned by the Education Consolidation Improvement Act (P.L. 100-297), Drug Free Schools (1986 Elementary-Secondary Education Act), and Eisenhower Math and Science (P.L. 89-10, Title II-A).

Nonspecified. Amounts from sources that could not separately report federal revenues by program. For example, the Georgia and Ohio State education agencies could not report most federal revenues of their school systems according to the above programs. In other cases, reporting units could provide most federal revenues by program but could not identify all by program. These revenues are included in "nonspecified" instead of "other."

Fiscal Year. The 12-month period at the end of which the school district determines its financial condition and the results of its operations and closes its books.

General Expenditure. All school system expenditure other than that classified as employee-retirement or other insurance trust expenditure.

General Revenue. All school system revenue except employee-retirement or other insurance trust revenue.

General Revenue From Own Sources. All general revenue exclusive of intergovernmental revenue. Includes taxes, contributions from parent governments, current charges, and miscellaneous general revenue.

Higher Education. See Education.

Instruction Expenditure. Relates to the instruction function (series 1000) defined in **Financial Accounting for Local and State School Systems**, National Center for Education Statistics, 1990. Instruction presented under the current operation or current spending headings includes payments from all funds for salaries, employee benefits (paid by school system only if under "current operation" or paid by both school and State if under "current spending"), supplies, materials, and contractual services. It excludes capital outlay, debt service, and interfund transfers. Instruction covers regular, special, and vocational programs offered in both the regular school year and summer school. It excludes instructional, student, and other support activities as well as adult education, community services, and student enterprise activities.

Instructional Equipment Only. Includes expenditure for all equipment recorded by school systems in general or operating funds under the "instruction" function.

Interest Earnings. Interest earned on deposits and securities including amounts for accrued interest on investment securities sold. However, receipts for accrued interest on bonds issued are classified as offsets to interest expenditure. Note that interest earnings shown under general revenue do not include earnings on assets of employee-retirement systems.

Interest Expenditure. Amounts paid for use of borrowed money.

Intergovernmental Expenditure. Amounts paid to other governments as fiscal aid in the form of shared revenues and grants-in-aid, school building authority payments, or in lieu of taxes. Excludes amounts paid to other governments for purposes of commodities, property, or utility services, any tax imposed and paid as such, and employer contributions for social insurance—e.g., contributions to the Federal Government for old age, survivors', disability, and health insurance for school district employees.

Intergovernmental Revenue. Amounts received from other governments as fiscal aid in the form of shared revenues and grants-in-aid, as reimbursements for performance of general government functions and specific services for the paying government, or in lieu of taxes. Excludes amounts received from other governments for sale of property and commodities. All intergovernmental revenue is classified as general revenue.

Intergovernmental Revenue From Federal Government. Intergovernmental revenue received by the school system directly from the Federal Government. Excludes Federal aid channeled through State governments.

Intergovernmental Revenue From Other Local Governments. Includes amounts paid to school systems from county government tax levies. This category also includes debt issued in the name of a county or city government (such as in Atlanta, Denver, and Milwaukee) paid to school systems and regional school system assessments from counties, cities, and towns.

Intergovernmental Revenue From State Government. All intergovernmental revenue received from the State government, including amounts originally from the Federal Government but channeled through the State.

Land and Existing Structures. Expenditures for the purchase of land, improvements to land, and existing buildings including purchase of rights-of-way, payments on capital leases, title search, and similar activity associated with real property purchase transactions.

Long-Term Debt. Debt payable more than 1 year after date of issue.

Long-Term Debt Issued. The par value of long-term debt obligations incurred during the fiscal period concerned, including funding and refunding obligations. Debt obligations authorized but not actually incurred during the fiscal period are not included.

Long-Term Debt Retired. The par value of long-term debt obligations liquidated by repayment or exchange, including debt retired by refunding operations.

Miscellaneous General Revenue. General revenue other than taxes, charges, and intergovernmental revenue.

Offsets to Debt. Cash and investment assets of sinking funds and other reserve funds, however designated, which are specifically held for redemption of long-term debt, including bond reserve funds, deposits with fiscal agents for the redemption of uncancelled debt, and balances in refunding bond accounts held pending completion of refunding transactions.

Other Current Spending. Current spending for other than elementary-secondary education instruction and support services activities. Included in this category are food services, enterprise operations, community services, adult education expenditures.

Other Education. See under **Education.**

Other Than Capital Outlay. General expenditure exclusive of capital outlay. Includes current operation, interest on debt, and intergovernmental expenditure.

Payments to Other Governments. Payments made to States, counties, cities, and special district school housing authorities including repayment of loans and debt service payments to entities that incur debt instead of the school system. Payments to other school systems are included in the table which display individual school systems but excluded (to avoid double-counting) in the State aggregate tables.

Property Taxes. Taxes conditioned on ownership of property and measured by its value. Includes general property taxes relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates, and taxes on selected types of property, such as motor vehicles or on certain or all intangibles.

Public School Systems. Includes independent school district governments and dependent school systems. Independent school district governments are organized local entities providing public elementary, secondary, special, vocational-technical, and higher education which, under the law, have sufficient administrative and fiscal autonomy to qualify as governments. Dependent school systems lack sufficient autonomy to be counted as separate governments and are classified as dependent agencies of some other government—a county, municipal, township, or State government.

Purchase of Land and Existing Structures. Purchase of these assets as such, purchase of rights-of-way, and title search and similar activity associated with the purchase transactions.

Revenue. All amounts of money received by a school system from external sources—net of refunds and other correcting transactions—other than from issuance of debt, liquidation of investments, or as agency and private trust transactions. Note that revenue excludes noncash transactions such as receipt of services, commodities, or other "receipts in-kind."

Salaries and Wages. Amounts paid for compensation of school system officers and employees. Consists of gross compensation before deductions for withheld taxes, retirement contributions, or other purposes.

School Breakfast and Lunch. Payments by the Department of Agriculture under the Child Nutrition Act for school lunch, special milk, and other programs. Excludes the value of commodities transferred under this program.

School Lunch Charges. Gross collections from cafeteria sales to children and adults.

Securities. Stocks and bonds, notes, mortgages, and other formal evidences of indebtedness.

Short-Term Debt. Interest-bearing debt payable within 1 year from date of issue, such as bond anticipation notes, bank loans, and tax anticipation notes and warrants. Includes obligations having no fixed maturity date if payable from a tax levied for collection in the year of their issuance.

State Aid. State revenue paid to the school system for any purpose, restricted or unrestricted, including the following:

Capital Outlay/Debt Service. Revenue paid for school construction and building aid including amounts to help the school systems pay for servicing debt.

Compensatory Programs. Revenues for "at risk" or other economically disadvantaged students including migratory children. Also includes monies from State programs directed toward the attainment of basic skills and categorical education excellence and quality education programs which provide more than staff enhancements—such as materials, resource centers, and equipment.

General Formula Assistance. Revenue from general noncategorical State assistance programs such as foundation, minimum or basic formula support, apportionment, equalization, flat or block grants, and State public school fund distributions. This category also includes revenue dedicated from major State taxes, such as income and sales taxes.

Handicapped Programs. Revenues for the education of physically and mentally handicapped students.

Payments on Behalf of LEA. State payments that benefit school systems but are not paid directly to school systems. Includes amounts transferred into State teacher or public employee retirement funds as well as into funds for other kinds of employee benefits, such as group health, life, and unemployment compensation. This category also includes State payments for textbooks and school buses that are provided to public school systems.

Staff Improvement Programs. Revenues for programs designed to improve the quantity and quality of school system staff. Examples include programs for additional teacher units, teacher benefits such as retirement and social security contributions paid directly to the school system, mentor teachers, teacher induction, staff development contracts and stipends, career ladder contracts, in-service training, health insurance, principal leadership, teacher quality contracts, and salaries for specific types of instructional and support staff.

Transportation. Payments for various State transportation aid programs such as those which compensate the school system for part of its transportation expense and those which provide reimbursement for transportation salaries or school bus purchase.

Vocational Programs. Revenues for State vocational education assistance programs, including career education programs.

Other. All other State revenues which are paid directly to the school systems including funds for bilingual education, gifted and talented programs, food services, instructional materials, textbooks, computer equipment, library resources, guidance and psychological services, driver education, energy conservation, enrollment increases and losses, health, alcohol and drug abuse, AIDS, child abuse, summer school, prekindergarten and early childhood, adult education (excluding vocational), desegregation, private schools, safety and law enforcement, and community services. In cases where these programs are covered under a State government's general formula assistance program, revenues will be shown under "general formula assistance" instead of under this category.

Nonspecified. State revenue amounts which pertain to more than one of the above categories but which reporting units could not provide distinct amounts into these categories. These revenues were included in "nonspecified" instead of "other."

Support Services Expenditure. Relates to support services functions (series 2000) defined in **Financial Accounting for Local and State School Systems**, National Center for Education Statistics, 1990. Support services presented under the current operation or current spending headings includes payments from all funds for salaries, employee benefits (paid by school system only if under "current operation" or paid by both school and State if under "current spending"), supplies, materials, and contractual services. It excludes capital outlay, debt service, and interfund transfers. It includes expenditures for the following functions:

General Administration. (Series 2300) – Expenditures for board of education and executive administration (office of the superintendent) services.

Instructional Staff Support. (Series 2200) – Expenditures for supervision of instruction service improvements, curriculum development, instructional staff training, and media, library, audiovisual, television, and computer assisted instruction services.

Operation and Maintenance of Plant. (Series 2600) – Expenditures for building services (heating, electricity, air conditioning, property insurance), care and upkeep of grounds and equipment, nonstudent transportation vehicle operation and maintenance, and security services.

Pupil Support Services. (Series 2100) – Expenditures for attendance record keeping, social work, student accounting, counseling, student appraisal, record maintenance, and placement services. This category also includes medical, dental, nursing, psychological, and speech services.

Pupil Transportation Services. (Series 2700) – Expenditures for the transportation of public school students including vehicle operation, monitoring riders, and vehicle servicing and maintenance.

School Administration. (Series 2400) Expenditures for the office of the principal services.

Other Support Services. Expenditures for business support (Series 2500), central support (Series 2800), and other support (Series 2900) services. Business support services include payments for fiscal services (budgeting, receiving and disbursing funds, payroll, internal auditing, and accounting), purchasing, warehousing, supply distribution, printing, publishing, and duplicating services. Central support services include planning, research, development, and evaluation services. They also include information services, staff services (recruitment, staff accounting, noninstructional in-service training, staff health services), and data processing services.

Nonspecified. Expenditures which pertain to more than one of the above categories. In some cases reporting units could not provide distinct expenditure amounts for each support services category. These expenditures were included in "nonspecified" instead of "other support services."

Taxes. Compulsory contributions exacted by a school system for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classified as insurance trust revenue. All tax revenue is classified as general revenue and comprises amounts received (including interest and penalties but excluding protested amounts and refunds) from all taxes imposed by a government. Note that school system tax revenue excludes any amounts from shares of State-imposed-and-collected taxes, which are classified as intergovernmental revenue.

Appendix B.
Notes Relating to Education Finance Data

The characteristics of elementary-secondary school finance data are influenced by accounting requirements mandated by each State education agency. The level of financial detail that school systems must maintain varies from State to State. Different State financing methods, such as making payments on behalf of school systems to fund teacher retirement, and the use of different accounting handbooks also cause variation. This variation creates differences in the content of information presented in this report. This appendix describes, on a State by State basis, these differences and adjustments made to improve data comparability.

ALABAMA

Although the Alabama school finance reporting system generally follows the function/object expenditure matrix contained in the Federal Government Handbook II, *Financial Accounting for Local and State School Systems*, Revised (1990), fixed charges are not broken out by function. These amounts were estimated according to the relative size of amounts reported by function for salaries and wages.

Payments to other school systems cannot be isolated in the Alabama school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both State aggregates and individual school systems.

Alabama school systems report State payments on their behalf in the financial statements sent to the State education agency. These payments are included in both the State aggregate tables which display elementary-secondary school finance data and the individual unit tables.

ARIZONA

Arizona's school finance reporting system does not correspond to Handbook II, Revised (1990). Pupil support, instructional staff support, and school administration expenditures could not be properly determined for individual school systems. The information for these items shown in tables 21 and 23 is therefore not comparable to information for school systems in other States. The State totals for these items (which appear in tables 15, 16, 19, and 20) were estimated based on data reported for acceptable cases in other States and on information submitted to the National Center for Education Statistics (NCES) in the National Public Education Finance Survey.

Arizona's reporting system also does not isolate expenditures for instructional equipment. These expenditures are combined with all equipment outlays and reported under "other equipment."

ARKANSAS

Payments made by the State government into the State teachers' retirement system on behalf of Arkansas school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

CALIFORNIA

California's school finance reporting system does not correspond to Handbook II, Revised (1990). Pupil support, instructional staff support, and general administration expenditures could not be properly determined for individual school systems. The information for these items shown in tables 21 and 23 is therefore not comparable to information for school systems in other States. The State totals for these items (which appear in tables 15, 16, 19, and 20) were estimated based on data reported for acceptable cases in other States and on information submitted to NCES in the National Public Education Finance Survey.

Payments made by the State government into the State teachers' retirement system and for textbook credits on behalf of California school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

California's reporting system also does not isolate expenditures for instructional equipment. These expenditures are combined with all equipment outlays and reported under "other equipment."

CONNECTICUT

Payments made by the State government into the State retirement system on behalf of Connecticut school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

FLORIDA

Payments to other school systems cannot be isolated in the Florida school finance reporting system. These amounts

are usually minor. They will slightly inflate the current spending amounts presented for both State aggregates and individual school systems.

IDAHO

The State financial reporting system does not isolate capital outlay payments for land and existing structures. All expenditures for the capital assets program (Idaho line code 810) appear under "construction." Other expenditures reported under the general "capital objects 500" category in the Idaho financial report are shown as "equipment" in this report.

Payments to other school systems cannot be isolated in the Idaho school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both State aggregates and individual school systems.

Payments made by the State government into the public employees' retirement system and for social security on behalf of Idaho school systems are included in both the State aggregate tables which display elementary-secondary school finance data and the individual unit tables.

ILLINOIS

The State financial reporting system does not isolate capital outlay payments for land and existing structures. These amounts are included with amounts shown for "construction." They are taken from the expenditures of the site and construction and capital improvement funds as reported in the Illinois State Board of Education annual financial statements.

Payments made by the State government into the State retirement system and for textbooks on behalf of Illinois school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

Illinois corporate personal property replacement tax revenues are included as State revenues in this report. These revenues are listed as "local" in other sources because they are a component of "local support" in State aid calculations.

INDIANA

Although the financial reporting system generally follows the function/object matrix contained in Handbook II, Revised (1990), employee benefit items reported by Indiana school corporations are not shown by function but instead are reported in "central support services." They consist of payments for retirement, social security, group insurance, workmen's compensation, and unemployment compensation. These benefits paid by the Indiana local school corporations were estimated by function according to the salaries reported for each function.

Payments made by the State government into the State retirement system and for social security on behalf of Indiana school corporations are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

KANSAS

Payments made by the State government into the State retirement system for school employees on behalf of Kansas school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

KENTUCKY

The Kentucky school finance reporting system does not follow Handbook II, Revised (1990). It does not allocate fixed charges by function. The Kentucky data have been adjusted to prorate fixed charges into the functions shown in this report based on their relative size. Pupil support, instructional staff support, and school administration expenditures could not be properly determined for individual school systems. The information for these items shown in tables 21 and 23 is therefore not comparable to information for school systems in other States. The State totals for these items (which appear in tables 15, 16, 19, and 20) were estimated based on data reported for acceptable cases in other States and on information submitted to NCES in the National Public Education Finance Survey.

Payments made by the State government into the State teachers' retirement system and for textbooks on behalf of Kentucky school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

LOUISIANA

Louisiana school systems report State payments on their behalf in the financial statements sent to the State education agency. These payments are included in both the State aggregate tables which display elementary-secondary school finance data and the individual unit tables.

MAINE

Payments made by the State government into the State teachers' retirement system on behalf of Maine school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

Pupil support, instructional staff support, and general administration expenditures could not be properly determined for individual school systems. The information for these items shown in tables 21 and 23 is therefore not

comparable to information for school systems in other States. The State totals for these items (which appear in tables 15, 16, 19, and 20) were estimated based on data reported for acceptable cases in other States and on information submitted to NCES in the National Public Education Finance Survey.

MARYLAND

Payments made by the State government into State retirement funds and for social security on behalf of Maryland school systems are included in both the State aggregate tables which display elementary-secondary school finance data and the individual unit tables.

MASSACHUSETTS

The Massachusetts school finance reporting system does not follow Handbook II, Revised (1990). This system does not allocate fixed charges by function. Data have been adjusted to prorate fixed charges into the functions shown in this report based on their relative size.

Instructional staff support expenditures could not be properly determined for individual school systems. The information for this item shown in tables 21 and 23 is therefore not comparable to information for school systems in other States. The State total for this item (which appears in tables 15, 16, 19, and 20) was estimated based on data reported for acceptable cases in other States and on information submitted to NCES in the National Public Education Finance Survey.

The State financial reporting system does not isolate capital outlay payments for land and existing structures. These payments are included in "construction."

Payments made by the State government into the State teachers' retirement system on behalf of Massachusetts school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

The Massachusetts reporting system also does not isolate expenditures for instructional equipment. These expenditures are combined with all equipment outlays and reported under "other equipment."

MICHIGAN

Payments made by the State government into the State school employees' retirement system and for social security on behalf of Michigan school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

MISSISSIPPI

The State financial reporting system does not isolate capital outlay payments for land and existing structures. This system only lists expenditures for "facilities acquisition and construction." These expenditures appear in this report under "construction."

Payments to other school systems cannot be isolated in the Mississippi school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both State aggregates and individual school systems.

State payments for textbooks made on behalf of the school districts are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

NEVADA

The local school support sales tax is included as revenue from State sources rather than as local sales tax. Revenue from the motor vehicle privilege tax is also included under State source revenue. The public utility franchise tax is classified as a public utility tax of the local school districts.

Payments to other school systems cannot be isolated in the Nevada school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both State aggregates and individual school systems.

NEW JERSEY

The New Jersey school finance reporting system does not follow Handbook II, Revised (1990). Pupil support, instructional staff support, general administration, and school administration expenditures could not be properly determined for individual school systems. The information for these items shown in tables 21 and 23 is therefore not comparable to information for school systems in other States. The State totals for these items (which appear in tables 15, 16, 19, and 20) were estimated based on data reported for acceptable cases in other States and on information submitted to NCES in the National Public Education Finance Survey.

Revenue data for interest earnings of independent school districts were estimated based on the amount of assets reported.

Payments made by the State government for employer contributions to the Teachers Pension and Annuity Fund and for social security payments on behalf of New Jersey school systems are included in both the State aggregate tables which display elementary-secondary school finance data and the individual unit tables.

NEW MEXICO

The New Mexico school finance reporting system does not follow Handbook II, Revised (1990). It does not allocate fixed charges by function. The New Mexico data for fixed charges have been prorated into the functions shown in this report based on their relative size. School administration expenditures could not be properly determined for individual school systems. The information for this item shown in tables 21 and 23 is therefore not comparable to

information for school systems in other States. The State total for this item (which appears in tables 15, 16, 19, and 20) was estimated based on data reported for acceptable cases in other States and on information submitted to NCES in the National Public Education Finance Survey.

State payments made on behalf of the school systems for textbooks are included in the state aggregate tables but are not available for inclusion in the individual school system tables.

Payments to other school systems cannot be isolated in the New Mexico school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both State aggregates and individual school systems.

New Mexico's reporting system also does not isolate expenditures for instructional equipment. These expenditures are combined with all equipment outlays and reported under "other equipment."

NEW YORK

Although New York's financial reporting system generally follows the function/object matrix contained in Handbook II, Revised (1990), employee benefit items are not shown by function. These amounts have been prorated into functional expenditure items by the State education agency.

NORTH CAROLINA

The State financial reporting system does not isolate capital outlay payments for land and existing structures. Expenditures for this item are included under "construction."

Payments to other school systems cannot be isolated in the North Carolina school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both State aggregates and individual school systems.

State payments for textbooks and transportation are included in the State aggregate tables which display elementary-secondary school finance data. These payments are shown in the revenue tables for individual school systems but not in the expenditure tables.

NORTH DAKOTA

The State financial reporting system does not isolate capital outlay payments for land and existing structures. This system only lists expenditures for "facilities acquisition and construction." These expenditures appear in this report under "construction."

OHIO

General administration and school administration expenditures could not be properly determined for individual school systems. The information for these items shown in tables 21 and 23 is therefore not comparable to information for school systems in other States. The State totals for these items (which appear in tables 15, 16, 19, and 20) were estimated based on data reported for acceptable cases in other States and on information submitted to NCES in the National Public Education Finance Survey.

OKLAHOMA

The Oklahoma school finance reporting system does not follow Handbook II, Revised (1990). It does not allocate fixed charges by function. The Oklahoma data for fixed charges have been prorated into the functions shown in this report based on their relative size.

Payments made by the State government into the State retirement fund on behalf of Oklahoma school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

PENNSYLVANIA

Payments made by the State government into the State school employees' retirement fund on behalf of Pennsylvania school systems are included in both the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

RHODE ISLAND

Payments to other school systems cannot be isolated in the Rhode Island school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both State aggregates and individual school systems.

Payments made by the State government into the State retirement fund on behalf of Rhode Island school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

SOUTH CAROLINA

Payments made by the State government for textbooks and school buses on behalf of the school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

TENNESSEE

The Tennessee school finance reporting system does not follow Handbook II, Revised (1990). It does not allocate fixed charges by function. The Tennessee data for fixed charges have been prorated into the functions shown in this report based on their relative size. Pupil support and instruction staff support expenditures could not be properly determined for individual school systems. The information for these items shown in tables 21 and 23 is therefore not

comparable to information for school systems in other States. The State totals for these items (which appear in tables 15, 16, 19, and 20) were estimated based on data reported for acceptable cases in other States and on information submitted to NCES in the National Public Education Finance Survey.

Payments made by the State government into the State retirement fund and for social security on behalf of Tennessee school systems are included in both the State aggregate tables which display elementary-secondary school finance data and the individual unit tables.

TEXAS

The Texas school finance accounting system does not isolate capital outlay payments for land and existing structures. This system only lists expenditures for "facilities acquisition and construction." These expenditures appear in this report under "construction."

Payments made by the State government into the State school employees' retirement fund and for textbooks on behalf of Texas school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

UTAH

Payments to other school systems cannot be isolated in the Utah school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both State aggregates and individual school systems.

VERMONT

Payments made by the State government for employee benefits on behalf of Vermont school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

VIRGINIA

The Census reporting system includes Virginia's "one-cent state sales and use tax" from local funds in the category of revenue from state sources.

WEST VIRGINIA

The West Virginia school finance reporting system does not follow Handbook II, Revised (1990). It does not allocate fixed charges by function. The data have been adjusted to prorate fixed charges into the functions shown in this report based on their relative size.

Payments made by the State government into the State teachers' and public employees' retirement funds on behalf of West Virginia school systems are included in the State aggregate tables which display elementary-secondary school finance data but are not available for inclusion in the individual unit tables.

WISCONSIN

Wisconsin's reporting system does not isolate expenditures for instructional equipment. These expenditures are combined with all equipment outlays and reported under "other equipment."

Publication Program

1992 CENSUS OF GOVERNMENTS

The Bureau of the Census has conducted a Census of Governments every 5 years since 1957 covering four major subject fields relating to State and local governments—organization, taxable property values, employment, and finances. The results of the 1992 Census of Governments are being issued in both printed and electronic formats. The printed material includes two preliminary reports and five volumes, which are described individually below. The electronic dissemination will encompass a variety of media—tapes, diskettes, CD-ROM, and electronic networks—described in a separate section following the report descriptions.

PRELIMINARY REPORTS

No. 1. *Government Units* National and State figures on number of governments by type.

No. 2. *Popularly Elected Officials* National and State counts of popularly elected officials by type of government and type of office.

FINAL REPORTS

Volume 1. Government Organization

No. 1. *Government Organization* Data for the Nation and by States on county, municipal, and township governments by population size; on public school systems by size of enrollment, grades provided, and number of schools; and on special district governments by function and amount of outstanding debt. Also shown is the number of local governments, by type, in each county area in the Nation. A description of local government structure in each State is a major feature of this report.

No. 2. *Popularly Elected Officials* Data for the Nation and by States on the number of officials directly elected by the voters, by type of office and by type of government. Also included is the number of officials that are elected directly by the voters in each county area in the Nation. This report includes also a tabular presentation describing elective offices authorized by State constitutions and general laws, with information for each office on length of term, geographic area, and method of compensation.

Volume 2. Taxable Property Values

No. 1. *Assessed Valuations for Local General Property Taxation* Figures for the Nation, States, counties, and cities having a population of 50,000 or more on assessed values (gross and net) of taxable property.

No. 2. *Taxable Real Property Assessment/Sales Price Ratios* Data on assessment levels—including assessment/sales price ratios and dispersion coefficients—that provide important statistical measures relating to real property taxation. Report provides information for selected State and county areas.

Volume 3. Public Employment

No. 1. *Employment of Major Local Governments* Statistics on October 1992 employment and payrolls for: all county governments; subcounty general purpose governments (municipalities and townships) having 25,000 or more population; school systems having 5,000 or more enrollment; and special district governments having 100 or more full-time employees.

No. 2. *Compendium of Public Employment* Employment and payroll data for the month of October 1992 by government function for the Nation, by States, and by type of government. Report also displays data summarized by county area for local government employment and payrolls.

Volume 4. Government Finances

No. 1. *Public Education Finances* Statistics on revenue, expenditure, debt, and financial assets of school systems, presented for the Nation, for States, and for school systems having 5,000 or more enrollment. Data describe financial activity in fiscal year 1992.

No. 2. *Finances of Special Districts* Fiscal year 1992 statistics on finances of special district governments, by States, and for selected large districts.

No. 3. *Finances of County Governments* Statistics on revenue, expenditure, debt, and financial assets of county governments in fiscal year 1992. Report provides national summaries, population size-group information, State area data, and displays of all individual county governments.

No. 4. *Finances of Municipal and Township Governments* Fiscal year 1992 statistics on revenue, expenditure, debt, and financial assets of municipalities and townships. There are national summaries and aggregations by population size-group and State. Report provides data for all individual municipalities and townships with a population of 25,000 or more.

No. 5. *Compendium of Government Finances* A summary of census findings on fiscal year 1992 government finances for Federal, State, and local governments. In addition to financial amounts, report includes derivative calculations of percentage distributions, per capita amounts, and amounts per $1,000 of personal income. Data are presented for the Nation, for State areas by type of government, and for local governments in each individual county area.

No. 6. *Employee Retirement Systems of State and Local Governments* Membership, receipts, expenditure, number of beneficiaries, and financial assets of State and local government employee retirement systems. Data are shown for the Nation, for States, and for individual retirement systems having assets of $50 million or more.

Volume 5. Guide to the 1992 Census of Governments

A compilation of table samples from the 1992 Census of Governments report series.

ELECTRONIC MEDIA

The census data will be available in the following electronic formats—diskettes or computer tapes; CD-ROM disks; and electronic network. The *diskettes or computer tapes* will be data files generally compatible with previous annual survey and census of government versions. In general, these files contain: State area data by type of government; local government county area totals; and individual government detail. The *CD-ROM disks* will provide information found in the diskettes or computer tapes, plus an electronic version of each report. *Electronic networks*, such as INTERNET and possibly others, will carry the data described as being available on diskettes or computer tapes.

HOW TO PURCHASE PRINTED REPORTS

When the printed reports described above become available, they will be sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20401.

Telephone or fax orders may be used to reduce processing time if your order is to be charged to VISA, MasterCard, or prepaid Superintendent of Documents Deposit Account. Customers will be able to call the Order Desk in Washington, DC, at 202-783-3238, between 7:30 a.m. and 4:00 p.m., eastern time, Monday through Friday, except holidays.

HOW TO PURCHASE DATA ON ELECTRONIC MEDIA

The Data User Services Division of the Bureau of the Census will market all electronic media described above. The telephone and fax numbers for ordering are: telephone, 301-457-4100; fax, 301-457-5198. To expedite processing, you can charge your order to VISA, MasterCard, or a prepaid Bureau of the Census account.
